It is important to note that the EJMATM standard is a trade association document containing guidelines for the use of expansion joints and [www.co.hunterdon.nj.us/pdf/recycling/recycling\\_guide.pdf](http://www.co.hunterdon.nj.us/pdf/recycling/recycling_guide.pdf). Hazardous Waste Collection: A complete list of acceptable and non-acceptable waste. "Waste management, 2005, No. 10, p. 23–29. Thirdly, during the production process, wastes may be generated that have a higher degree of danger due to their high concentration and toxicity compared to other wastes. Thus, many chemical enterprises in the production process use a significant amount of nitric acid, which in itself is a strong poison. Due to the low volatility of nitric acid, it accumulates in special containers. fffad4f19a
